# MINING, BUSINESS AND STOCKS.

# CONDITIONS IMPROVE AT NEVADA HILLS

Negotiations Being Made for Electri-cally Equipping Property—Rich Ore Found on Lower Levels.

While but little information has been out on the Nevada Hills property in the past few months, it was learned today that at the mine better rearried today that at the mine better values are being obtained on the low-est levels, that sufficient ore is being taken out to cover the expenses of development work and accumulate a little surplus, and that negotiations are now being carried on which will result in the Nevada Hills, Fairview Eagle and Nevada Wonder properties being electrically equipped.

in the Nevada Hills, Fairview Eagle and Nevada Wonder properties being electrically equipped.

Six months or more ago considerable water was encountered in a winze off the 550-foot level. The ore that came in with the water and of which nearly a carload was taken out before the water stopped the work, ran high in gold and silver. Since then the company has drifted in from the 450-level and encountered a break which was filled with water. It has been ascertained that a north and south break cuts the property. This has been filled more or less with clay that has held the water back. For a time it came so fast that it was necessary to hoist it. Since then the water has dried up and for the past two weeks there has been no water at the mine.

The drift on the 450-foot level has picked up the ore on the east side of the break. In the upper levels the ore was to the west of the break of the break of the break of the break in the upper levels the ore was to the west of the break. The management is confident that carries \$500 in gold and silver values. The management is confident that in time this vein will broaden out into a permanent body of ore. A sample from this vein, taken recently, showed returns of \$1,000 in gold and 1,200 ounces in silver.

IMPROVING FAST.

IMPROVING FAST.

The property continues to improve right along and by next summer it is confidently believed that some big things will be happening at the Nevada Hills. The richest rock taken out contained but a very small percentage in lead, if any, and a small amount of zinc.

and Hills. The richest rock taken out contained but a very small percentage in lead, if any, and a small amount of zinc.

It is understood that the Nevada Wonder mine which is operating about is miles north of the Nevada Hills, was the highest bidder for the water power offered for sale by the United States government from its Irrigation proposition in the Carson sink. The water will generate 3,000 horse power, and it is the intention of the mining company to use it to furnish lighting for the town of Wonder and its own mine. The final arrangements relative to the company taking over the water power have not been agreed upon, but will probably be closed up in a few days. The power will be generated at Fallon. There has already been a tentative agreement for the furnishing of power to the Nevada Hills and Fairview Eagle properties. This will give the companies a more economical method of pursuing their work.

For several weeks the Nevada Hills and Fairview Eagle, which is owned by George Winfield of Goldfield, have been shipping but little one to market, on account of the bad roads prevailing on the 40 mile route to the railroad. Twelve miles of the distance is over alkali flats that in wet weather are almost impassable.

The Nevada Hills has several shipments of high grade ore on the dumps, and this will be sent to market as soon as the roads are in a passable condition. The property at present is working 20 men and the Eagle is probably enploying 15 men.

Resides the work being done at these two mines considerable prospecting is going on in the country.

### TINTIC ORE SHIPMENTS.

TINTIC ORE SHIPMENTS.

The following were the ore shipments from the Tintic district for the week ending Friday night. This week shows a marked improvement over last week and it looks probable that February will bring in bigger carnings to the Tintic companies than in January. The shipments in carload lots were: Dragon Iron, 23 carloads; Iron Blossom, 18; Colorado, 19; Sloux, 14; Beck Tunnei, 2; Opohongo, 2; Centennial Eureka, 44; Eureka Hill, 2; Gemini, 2; Ridge & Valley, 2; Grand Central, 4; Mammoth, 1; Gold Chain, 1; Eagle & Blue Bell, 4; Uncle Sam, 2; East Tintic Development, 1; May Day, 2, Total, 145 carloads.

### MORE TUNGSTEN CLAIMS

L. Fletcher, acting for O. A. Turn-president of the Tungsten Mines apany, whose properties are at the b, White Pine county, Nevada, filed the county recorder certificates location on the following lode mining claims: Amy, Marker, Transit, Square, Ted, Chain, Lloyd, Tape, Plumb-Bob, Reel and Level. hese claims join on the estate pre-

viously owned by the Tungsten com-pany. All the stakes have been placed, the claims surveyed, and the location work completed within the re-quired time.

### FAT FEES FOR MEN.

Hammond and Thomas Get Much for Mining Sale.

Mining Sale.

Denver, Feb. 12.—Two fees, said to be the largest of the kind ever obtained, have been given to two men in connection with the negotiations for the sale of the San Gertrude mine, in Mexico, to the Camp Bird, limited, which bought the Camp Bird mine from Thomas F. Walsh for \$10,000,000. John Hays Hammond, the mining engineer, received a \$580,000 fee for bringing about the transfer of the San Gertrude property, while former Gov. Charles S. Thomas of Colorado will receive \$100,000 for his share in the deal in drawing up the legal papers. Thomas is in Mexico completing the deal.

# SIOUX CONSOLIDATED MAILS ITS REPORT

Stockholders Getting Financial State ment—Number of Rich Strikes Re-ported From Tintic District.

(Special to The News.) Provo, Feb. 12.—Stockholders of the Sioux Consolidated Mining company are receiving a copy of the financial statement made by the company at its annual meeting. The statement shows the condition of the company's affairs at the close of the year.

According to the statement the com-pany had \$63,457.30 in the treasury at the beginning of the year 1909. During pany had \$63,457.30 in the treasury at the beginning of the year 1999. During the year it sold ore to the extent of \$655,482.39. The total amount of dividends disbursed in 1999 was \$566,495.44 and the total expenditures for the company for the year were \$741,834.01. The amount of cash the company had on hand at the beginning of the present year was \$\$,105.68.

Manager C. E. Loose, in his report, states that during the year the amount of drifting on the 400-foot level was 910 feet, and that there were 150 feet of ralses. On the 450-foot level, 632 feet of drifting was done and 222 feet of arises. Practically all of this was in pay ore. On the 200-foot level the drift was continued 600 feet to the west in search of ore and that in that distance 130 feet of crosscuts were run. Thus far no ore has been encountered.

A strike of considerable importance has been reported at the Yankee Consolidated. It is declared that ore has been renountered in the shaft which is to the north and a short distance above the tunnel. Ore has been opened up for 20 feet and it is declared to carry 35 per cent lead and considerable gold and silver.

At the Eagle and Blue Bell property a strike has been made on the 1,200-foot level. It is the same ore body as was found on the 1,100-foot level. It contains 15 per cent-lead and excellent values in gold and silver. The ore is declared to be a much better grade than that found in the level above.

RETURN FROM TRIP.

### RETURN FROM TRIP.

RETURN FROM TRIP.

W. F. Glies, Harvey Cluff and W. D. Rawson have just returned from an inspection trip to the Big Nebo mining property east of York. The incline shaft, which was sent down in a vein of lead and Iron has reached a depth of 50 feet and a drift has been started to catch the ore body. This drift is now in a lime formation that is identical with the lime which lays next to the ore body that outcrops on the surface. It is believed that the ore body will be reached in another 150 feet. This will give a depth of 350 feet.

The men also visited the Tintic Del The men also visited the Tritic Def-mar property. The tunnel Is now in a distance of 227 feet where it has en-countered a cave. The cave is filled with carbonate vein matter and has every indication of being close to ore.

### TALKS OF GOLDEN REEF.

### Grade Mine.

The Golden Reef Mining company owns 20 claims in its domain in Beaver county, three miles from the Beaver Carbonate mine and five miles north of the famous old Horn Silver mine at Frisco. This property has been worked for years, and has had \$50,000 expended on it in development, says Willard Pehrson, secretary of the company.

pended on it in development, says Willard Pehrson, secretary of the company.

On one claim there is a 1,000-foot tunnel that has cost a small fortune. About 150 feet from its portal an 85-foot ore-bearing vein was cut. This rock showed values of \$2.50 to \$10 in gold and lead. The ore shoot was followed down 135 feet by an incline shaft. Recently a 235-foot shaft has been sunk on the out croppings. Two shifts have been working all winter. This work was in the porphyry and quart-site. In one pocket in the quartsite two carloads of rich ore were recently taken out and shipped. This ore went \$22.80 in gold and 14 per cent lead. Much milling ore has been piled up on the second class dump.

"What we are depending on is a big milling proposition out there on our Golden Reef property," says Mr. Pehrson, one of the largest stockholders, "Rich pockets and streaks are encountered, a single pocket of which gave up about 50 tons of high grade ore, but our dependence is in quantities of low grade milling ore for permanent returns. Otherwise we would not continue to put the money into this property that we have been doing for years."

### CONCENTRATES.

All the stock exchanges throughout the United States are today closed. London is the only market of Ameri-can stocks that is open.

C. E. Short of the Gold Springs Min-ing and Power company, has gone to Los Angeles for a two weeks' visit,

Theodore Parks, well known as a gold mine operator, was in from the new camp of Jarbridge yesterday. He declares that the district is a most peculiar one. He asserts that there are dikes that are all ore which outcrop above the surface for 30 and 40 feet. The system of ore bearing dikes he asserts is most unusual.

A. L. Corey has returned from the camp of Gold Circle. The new Rex mill he says has begun operations, but it will be a month before the machinery is handling the full capacity of 50 tons of ore a day. Everything is automatic and but two men are required to operate the mill. The Hartley mill was operated until two weeks ago when it was closed down to add two more 10-ton units and make repairs.

pairs.

Supt. J. E. Merritt of the Death Valley Gold Mining company was in the city yesterday with the information that the company has discovered water within four miles of the minand at an elevation that will permit its being sent to camp by gravity. The company has a large tonnage of low grade ore ready for a mill but the drawback has been the lack of water. The finding of a good water supply means a new life to the company. The company has already filed on the water right.

Fred T. McGurrin is one of the aret

Fred T. McGurrin is one of the ilrst Salt Lakers to locate property in the camp of Jarbridge. In a letter from that place he asserts that the snow is still too deep for any new prospecting, and that he does not expect much to be done until far into the spring. The gold hunters are flocking into the camp at the rate of 25 a day.

Chet Worthington, operating the Dry Canyon Mines company in Dry canyon, is in the city. He declares that as soon as the machinery is in he will start an active campaign of development.

B. H. Hunt, manager of the Deer Train property of the Park Valley district is in the city on business.

At the Ely Centennial property in Ely another shaft has been started at the east end of the property. This is simply for prospect purposes and already it is declared to have struck ore. This is nearest the Ely Calumet where a dozen men are now at work.

# IRON BLOSSOM MINE **DEVELOPING MUCH ORE**

ense Body Promised When Ore Is Reached on the 500 Foot Level— Commercial Ore Is High Grade.

Although many were disappointed t the dividend announced by Iron Blossom for the first quarter of 1910, there are others who feel that it is an excellent showing in view of mar ket conditions. Engineers who have recently visited the property declare

recently visited the property declare it is in as fine shape he ever in its history and that not only has it a large tonnage of ore in sight, but the prospects for larger bodies were never better.

At the No. 3 shaft where the rich ore is being shipped from, the shaft has reached the 500-foot level, where a station is being cut. From this a drift will be sent to the east to get under the ore body, from which the rich shipments are being made. The veln that is being worked is going down strong and there is no doubt but what the ore will be opened up on the lowest level.

down strong and there is no doubt but what the ore will be opened up on the lowest level.

On the 390-foot level, which is now the lowest level worked by the shaft, the ore body pitches to the east and away from the shaft. This ore body is in places 80 feet wide, and has been stoped for a vertical depth of at least 100 feet. In the floor of this level a winze was sunk in ore for 40 feet. At that depth the foot wall was encountered. Around this winze considerable ore has been stoped out.

From indications it is certain that the ore will be encountered on the 500 foot level as the winze has already traced it to within 80 feet of that level. It is estimated that the drift on this level will have to advance something like 390 feet to reach the ore.

Under the new contract the Iron Blossom is also extracting ore from the 500 and 600-foot levels of the No. 1 shaft. This shaft is at the 1,300-foot level and is to be sent to the 2,000-foot level and is to be sent to the 2,000-foot level. The ore that is betting found below the 600 is not of high enough grade to stope. The vein is being found in all levels and the management expects to get a large body of copper ore at greater depth.

#### MACNEILL MAKES STATEMENT. Says Earnings Would be Ten Million a Year.

Year.

Boston, Feb. 12.—President Charles MacNelll of the Utah Copper company says that the production of the new Utah Copper company, including the Boston Consolldated, Nevada Consolldated, Cumberland-Ely and the original Utah company, will be, as soon as enlargements now proposed to the Garneld & Boston plants are completed, 200,000,000 pounds of copper per annum, which can be produced at approximately 8 cents per pounds. If this product 8 cents per pounds. If this product id sold at 13 cents, the ore would be had sold at 13 cents, the ore would be still about 5 cents a pound, or \$100 pro-fit per ton of copper. The 100,000 tons production of the enlarged company would therefore yield a gross profit of \$10,000,000 per annum and would enable the company to genn 10 per cent on the 2,000,000 chares based upon 550 per share valuation. Each additional increase of a cent a pound above 13 cents in the price of copper would add to the gross income of the combined companies \$2, 600,000 per annum.

### BULLOCK HOLDS MEETING.

Directors Are Elected-Annual Repor

Directors Are Elected—Annual Report Heard.

(Special to The News.)

Provo, Feb. 12.—At the annual meeting of the Bullock Mining and Milling company last night the following were the directors elected for the ensuing year: B. H. Bullock, Wilford F. Giles, A. O. Smoot and LeRoy Dixon. The directors will meet later and organize. B. H. Bullock as manager of the company submitted the report of the work accomplished. During the year the company built a double compartment shaft to the depth of 210 feet. He said the shaft will be sent 100 feet deeper as soon as the company can better care for the water. During the year there was 350 feet of drifts and crosscuts made. It was asserted that the stope from which ore has been taken for several months past is now nearly exhausted above, but appears to be going down with considerable strength. Two car loads of ore have been shipped this year and there are now 20 tons of high grade ore in the bins.

bins.

In the north drift stringers of ore are beginning to come in. From indications it is believed that it is indication of the presence of an ore body. An assay made showed 25 ounces of silver, 12½ per cent copper, 2½ per cent lead, and \$1.50 in gold.

The company now has \$1,675 in the treasury. treasury.

### RAILROAD NEWS

### RUMOR REACHES DENVER.

RUMOR REACHES DENVER.

Denver, Feb. 12.—Absorption of the Western Pacific railroad, name and all, by the Denver & Rio Grande railroad, and the operation of the transcontinental line, formed by the two working in conjunction, with Denver as headquarters for the enlarged system, is the prediction made by The Republican today upon information claimed to be semi-official.

Regarding the proposed consolidation The Republican quotes a Denver & Rio Grande official as follows:

"We do not know for a certainty that this move is going to be made, but much more improbable things have been done in railroad consolidation. It is not a wild dream by any means."

It is pointed out that the Western

tion. It is not a wind dream by any means."

It is pointed out that the Western Pacific with its 921 miles of track is practically only an extension of the Denver & Rio Grande with its 2,500 miles of road; that the Rio Grande owns \$50,000,000 of the \$75,000,000 capital stock of the Western Pacific.

### MACHINISTS ON STRIKE.

Reno, Nev., Feb. II.—All the machinists in the Sparks car shops of the Southern Pacific quit work this afterneon, and 70 strong marched out of the grounds. The news of the strike came so suddenly that it was impossible to make a thorough investigation into the cause and extent of the walkout, but it is learned that it came almost without warning. Ten minutes after the wheels ceased turning, the

shops were deserted. The roundhouse employes and trainmen are not affected by the strike.

An attempt to get into communication with the superintendent's office this afternoon failed, the only information given out being that the machinists had walked out and that the trouble was a local one.

At the local Oregon Short Line office nothing was known of the Renatrouble Friday night. There was some slight friction a week or more ago reported over one man, but it was supposed at headquarters that the matter was comparatively trivial, and had been settled. Details of the exact cause of the affair were not known to the officials yesterday.

#### CLARK AND WELLS COMING.

CLARK AND WELLS COMING.
Second Vice President J. Ross
Clark and General Manager R. E.
Wells of the Salt Lake Route are expected to arrive in this city tomorrow for a conference with William H.
Bancroft, first vice president of the
road and the engineers who have just
returned from examining the Ploche
and St. George routes for the line of
the newly constructed Salt Lake Route.
While the engineers have doubtless
agreed tentatively at least upon certain recommendations with regard to
the new route, they decline to talk
for publication and the public must
await the pleasure of the railroad officials to learn the purport of the
recommendations.

### WILD CAT INSURANCE.

State Commissioner Receives a Communication From Idaho on Subject.

The state insurance commissioner re-ceived the following letter today, from the Idaho state insurance commis-sioner at Boise, which will be read with interest in local fire insurance

sioner at Bolse, which will be read with interest in local fire insurance circles:

"Will you kindly ascertain and advise this department as to whether or not the Western Fire Insurance company of Phoenix, A. T., has any securities or other assets of any kind or description in Utah upon which an attachment could be levied? This company was refused a license in February, 1993, by this department. I have recently ascertained the company has been transacting some business in Idaho. I have in mind a citizen who placed insurance with this concern and lost \$5,000, and has been unable to secure settlement with the company. It is unfortunate that people will continue to do business with unauthorized or wild cat insurance concerns. There is, however, no law on our statutes prohibiting individuals from purchasing insurance in unauthorized companies, and the only action we can take is to arrest and prosecute all agents of such companies whenever we can secure evidence that they are operating in Idaho. It is to be regretted that this party should have placed his insurance in an unauthorized company, when there are some \$0 odd fire insurance in an unauthorized company when there are some \$0 odd fire insurance in an unauthorized company when there are some \$0 odd fire insurance in an unauthorized company when there are some \$0 odd fire insurance in an unauthorized company when there are some \$0 odd fire insurance in an unauthorized company when there are some \$0 odd fire insurance in an unauthorized to company when there are some \$0 odd fire insurance in this state which have fully compiled with our laws. In my opinion he has no recourse other than to bring suit in his own county or in the state of Utah, or such other state where service of process may be had; but even this would be of little use, if the company has nothing upon which an attachment can be levied."

### CHIEF AGENT LEACH HERE.

R. B. Leach, chief special agent of the manufacturing and mining department of the census bureau at Washington, D. C., arrived in Salt Lake this morning for the purpose of establishing headquarters for collecting information in relation to these departments in this state. The department of which Mr. Leach will be held will be separate from the state bureau, and the employes for this branch will be recruited from those who passed the civil service examination held at the postofice in this city last November. Mr. Leach called upon the federal officials in this city this morning, and also upon Hugh A. McMillin, director of the census bureau for Utah, and it is probable that he will establish headquarters in rooms adjacent to Mr. McMillin's offices on the fifth floor of the Dooly block. R. B. Leach, chief special agent of

### WAR SEEMS CERTAIN.

Vaudeville Interests as Far Apart as Ever.

Advices have been received from New York that as a result of a meeting of theatrical men in the office of William Morris (Inc.), a vaudeville war is now more certain than ever between Morris and Martin Beck, manager of the Orpheum circuit in the western cities. All efforts failed to combine the two interests, and Mr. Morris will establish a chain of theaters to the coast. Another effort will be made, it is stated, to induce Mr. Morris to give up his idea of establishing a western circuit, but it is doubtful, because he has theaters leased or under construction in Salt Lake, Denver, Seattle, Spokane, Kansas City and Los Angeles.

Mr. Morris declared after the meeting that he intended to book the best in vaudeville in the west and import a number of acts from Europe. It is expected that the Morris circuit will open in Soptember, but the new theater in Sait Lake, which is now being constructed, will not be ready before October. Advices have been received from New

### PLEASING VALENTINE PARTY.

Mrs. N. H. Tanner of 760 Ninth East street entertained the officers of the First Ward Primary Thursday night at a valentine party. The table night at a valentine party. The table was decorated with flowers, and in the center was a Bridge of Sighs and brokes, hearts. About 18 women were present and reminiscences of some past love affair, either real or imaginary, was given by each of the guests. Mrs. Florence Eiggren captured the first prize, for bottling the first real tear during the story telling contest.

# TRADE REPORTS ARE CONFLICTING

Just What Business Conditions Are It Is Quite Difficult To Determine.

#### MANY BUYERS IN THE MARKET

Generally Their Operations Are Conservative—Large Corporations Making Close Prices.

Co.'s Weekly Review of Trade tomorrow will say: Reports of trade conditions are some-what conflicting. While much activity

prevails in the finished branches of iron and steel the dullness in pig iron is be coming more pronounced. Many buyers are in the dry goods markets, but their operations are generally conservatively steady. Jobbers

are doing almost an average season's business, but have fallen short of the expectations of great activity.

expectations of great activity.

Large corporations are seeking a full business and have made close prices with that end in view.

The shoe trade is a waiting one. Since the departure of buyers from the Boston market new contracts have been infrequent, although manufacturers look for larger orders at any time. The market on all varieties of domestic hides is very dull.

### BANK STATEMENT.

New York, Feb. 11.-The statement of New York, Feb. 11.—The statement of clearing house banks for the week (five days) shows that the banks hold \$24,—173,060 more than the requirements of the 25 per cent reserve rule. This is a decrease of \$2,549,825 in the proportionate cash reserve, as compared with last week.

The statement follows:	
Loans	1,223,367,600
Decrease	9,321,000
	1,235,416,600
Decrease	16,303,900

the clearing house banks today was

The statement of banks and trust companies of Greater New York not reporting to the clearing house shows:
Loans\$1,155,038,400
Decrease 5,352,200
Specie 127,267,700
Increase 2,244,800
Legal tenders 20,959,800
Increase 585,000
Total deposits 1,229,435,300
Decrease 14,686,300
The Elpanoler this week says:

The Financier this week says:
"Owing to the fact that Saturday was a legal holiday, the clearing house banks of the city of New York made their statement Friday, Feb. II, covering the five days of the week.

"Taking the actual condition of the banks as a basis, the loans showed an increase of \$21,684,000; cash holdings remained just about stationary, while deposits, by reason of the heavy loan increase, expanded \$22,516,200. The result was that while there was no gain in cash, the surplus reserve rose \$5,608,350, on account of the lessened requirements, due to contraction in deposits. The excess reserve now stands at \$29,057,225.

"The statement of averages did not beautiful to the close of the statement of averages did not show the actual changes up to the close

The excess reserve now stands at \$29,057,225.

"The statement of averages did not show the actual changes up to the close of the week, but these will be exhibited in the next average showing. The average surplus returns is \$23,447,050, or \$5,000,000 less than shown in the actual statement. The summary of state banks and trust companies not reporting to the clearing house showed a decrease of \$5,353,300 in loans, an increase of about \$2,750,000 in cash, and a decrease of \$3,653,400 in net deposits.

"The loan contraction in the case of all the banks was traceable for the most part to stock exchange liquidation."

10 shows an aggregate of \$3,517,833,000, against \$3,703,533,000 last week and \$2,820,-587,000 in the corresponding week last year. The following is a list of the cities:

### LATE LOCALS

Concerts and Recitals—Mrs. Susa Young Gates will lecture before the parents class in the Twenty-fourth ward Sunday morning, her subject being "Concerts and Recitals."

Y, W. C. A. Vesper Service—At the 5 o'clock service tomorrow at the Brooks arcade rooms, Rev. Francis Burgette Short will speak Special music, fellowship lunch and social half-hour will follow. All women and girls are cordially invited.

Johnson Recovering—Morris Johnson, the young man who accidentally shot himself in the left breast while cleaning a revolver Friday afternoon, is still improving. He is at the Keogh-Hammond hospital and it was reported from there this afternoon that the young man is rapidly recovering.

Dinwoodey Family Reunion—At the home of Mr. and Mrs. James Dinwoodey last Thursday evening a family reunion was held in honor of Charles E. Dinwoodey, Mrs. Dinwoodey and their two sons, lately returned from a four years' service in the Eastern States mission. Fourteen guests were present.

W. H. Foote and R. W. Foote, two farmers from Hastings, Neb., are at the Cullen on their way to Juab county, where they have purchased fruit farms under the shadow of Mount Nebo. The under the shadow of Mount Nebo. The new settlement is called Elberta, no doubt from the Elberta peach, ground there being particularly well adapted to peach growing. It is located some distance north of Nephi, along the hill lands, which are fast being converted into garden spots. "We paid \$150 an acre for the land only a short time ago," sald Mr. Foote, "and now I understand it is worth \$200 an acre. The ground has a splendid perpetual water right. We expect to soon have it all planted to fruits and small stuff, and look to our Utah investment to prove even more profitable than our Nebraska farms. Utah looks good to us."

### LECTURE ON SOCIALISM.

John M. Work, lawyer, of Iowa, one of the many national organizers of the Socialist party will lecture on "What's so and what's isn't about Socialism," at Unity hall, 128 south Second East street, on Sunday evening at 8. Mr. Work will answer any question on the subject that may be presented in writing.

the subject that may be presented in writing.

Several years ago Mr. Work was engaged to lecture against Socialism, but while investigating the subject for material for his lecture, he became convinced of its advantages and ever since has been lecturing in its favor. He is said to be an eloquent speaker.

#### WARD ENTERTAINMENTS

Whitney Hall—The dates of the esentation of "The Dress Rehearsal," presentation of "The Dress Rehearsal," which is being arranged for the benefit of the Whitney hall fund, with Prof. Careless as director, and Miss Sybella Clayton as accompanist, are next Saturday afternoon for children only, and the following Wednesday and Friday evenings for adults. The piece has been reconstructed, brought down to date and generally rendered unrecognizable by the committee in charge.

banks and trust companies not reporting to the clearing house showed a decrease of \$5,353,300 in loans, an increase of about \$2,750,000 in cash, and a decrease of \$3,653,400 in not deposits.

"The loan contraction in the case of all the banks was traceable for the most part to stock exchange liquidation."
